2002/95/EC (RoHS) Compliance

This letter is in response to a request for compliance information for European Union Directive 2002/95/EC (also known as RoHS, Restriction of Hazardous Substances). At this time, Dynic USA Corporation, believes that all of our Sirius[®] thermal transfer ribbon products comply with the Directive's restrictions on Lead (Pb), Mercury (Hg), Cadmium (Cd), Hexavalent Chromium (Cr(Vi)), Polybrominated biphenyl flame retardants (PBB), and Polybrominated biphenyl ether flame retardants (PBDE). These restricted substances are not intentionally added during manufacturing and are not known to be present.

To the best of our knowledge, our raw materials suppliers do not use the substances listed above in the manufacture of their products. However, we are currently testing and collecting proof of compliance from our suppliers. Once we have this documentation, we will make available a Statement of Compliance for each of our products. In the meantime, Material Safety Data Sheets (MSDS) are available upon request. If you have further questions about any Dynic product, please do not hesitate to contact us.

Regards,

A handwritten signature in black ink, appearing to read 'Jean Bigelow', written over a horizontal line.
