

HL72 Resin Thermal Transfer Ribbon

General Purpose Resin for Films

HL72 is a general purpose resin that can be used in both flathead and near-edge printers. It provides good resistance to scratching, smearing, and alcohol. It is ideally suited to PET, polyethylene, polyester and BOPP films, but also has the substrate flexibility to work on coated and gloss papers. HL72 is a versatile resin ribbon that provides a good print solution for a wide variety of applications, printers, and substrates.

Applications Include:

- Asset tracking
- Electronics labeling
- Hang tags
- Hazardous materials labeling
- Horticulture, lumber, & nursery labels
- Shelf & bin labels
- Print & apply
- Preprinted tag & label stocks
- Tamper evident labeling
- Other industrial labeling

Compatible Substrates:

- Ideal for films, including PET, PE, PP, and BOPP
- Coated & Gloss Papers
- Synthetic Labels (Polypropylene & Polyester)
