

Sirius C3 Color Wax-Resin ribbons complement Dynic USA Corporation's existing line of color thermal transfer ribbons, which include wax, resin, and near-edge formulations. The C3 ribbons provide vibrant color and are available in blue, red, green, brown, yellow, orange, maroon, purple, and white. C3 ribbons print at high speeds (10 i.p.s.) and are ideally suited for applications such as retail tag labels, shipping labels, flexible package printing, bin labels, garment tags, wrist bands, and various other applications where color is essential. They provide consistently clear print quality and a high degree of scratch resistance at the same price as a wax ribbon.

Sirius C3 Color Wax-Resin ribbons can be ordered in rolls to fit all popular thermal transfer printers. Custom slitting to non-standard widths and lengths is also readily available for special applications.
